WOUND & SANITIZATION GEL

Revolutionary Wound Healing & Germ Protection

DIRECTIONS

Move excess hair from wound area (clip if necessary). Apply gel on the wound to clean, treat infections and promote healing. If dressing is required, spread gel liberally on the wounded area and then dress the wound. Repeat as many times a day as necessary until wound is healed.

Argasol® Silver Gel has been clinically proven as a broad-spectrum anti-bacterial aid against wound and skin pathogens. Its 4-hour continuous bacteria protection also kills yeast and fungi, helping manage 'hot spots' and localized skin infections. The gel is an effective anti-microbial, emollient and skin protectant. It does not sting and is gentle on your pet.

INGREDIENTS

Purified Water, Triethanolamine, Carbopol ETD 2020, 24ppm Silver

Why Argasol®?

- Moisturises & softens skin upon application
- Non-cytotoxic (will not hurt normal cells)
- Suitable for use with other secondary dressing products
- Eases discomfort of burns, wounds, bites or itches
- Odourless, alcohol-free and needs no refrigeration
- Does not irritate the skin, mouth or eyes

What is it used for?

Argasol® Silver Gel is indicated for the management of traumatic wounds, cuts, abrasions, skin irritations, post-surgical incisions and burns. It is safe for use around the eyes, mouth and nose.
