# WOUND & SANITIZATION SPRAY

Revolutionary Wound Healing & Germ Protection

## DIRECTIONS

Move excess hair from wound area (clip if necessary). Spray on the wound to clean, treat infections and promote healing. If dressing is required, spray liberally to wound area and dress the wound. Repeat as many times a day as necessary until wound is healed.

Argasol® Silver Spray has been clinically proven as a broad-spectrum anti-bacterial aid against wound and skin pathogens. Its 4-hour continuous bacteria protection also kills yeast and fungi, helping manage 'hot spots' and localized skin infections. The spray can be used both topically and orally as an effective anti-microbial and skin protectant. It does not sting and is gentle on your pet.

## INGREDIENTS

Purified Water, 32ppm Silver

## Why Argasol®?

- Disinfects and cleans wounds
- Non-cytotoxic (will not hurt normal cells)
- Suitable for use with other secondary dressing products
- Eases discomfort of burns, wounds, bites or itches
- Odourless, alcohol-free and needs no refrigeration
- Does not irritate the skin, mouth or eyes

## What is it used for?

Argasol® Silver Spray is indicated for the management of traumatic wounds, cuts, abrasions, skin irritations, post-surgical incisions and burns. It is safe for use around the eyes, mouth and nose.
